Thailand

"As a recent graduate from **Generation Junior Software Developer Bootcamp (Cohort 6)**, I have experience using programming languages such as C++, C# and Python to do IOT projects. Since graduating, I've spent nearly a year delving into the dynamic world of Front-end development. My primary focus has been on mastering foundational languages such as HTML, CSS, and JavaScript. Additionally, I've embraced the power of frameworks like React and incorporated tools like Tailwind CSS and styled-components into my projects, adding my personal touch to each development endeavor."

LEARNING EXPERIENCE

FRONTEND MENTOR

January 2022 - Present

- Completed over 25 projects from Frontend Mentor, utilizing HTML, CSS, and JavaScript for each project. The project designs were created using Figma, as provided by the website.
